NETWORK WITH NATURE

1 regeneration

2 park at the heart

3 walking our stories

4 revitalization & regrowth

5 active connections

PARK AT THE HEART

Creating new neighbourhoods around an integrated park system and trail network to ensure active transportation connections, ecological connectivity, and accessible green space. Creating opportunities for residents to get more involved in the future of their green spaces.

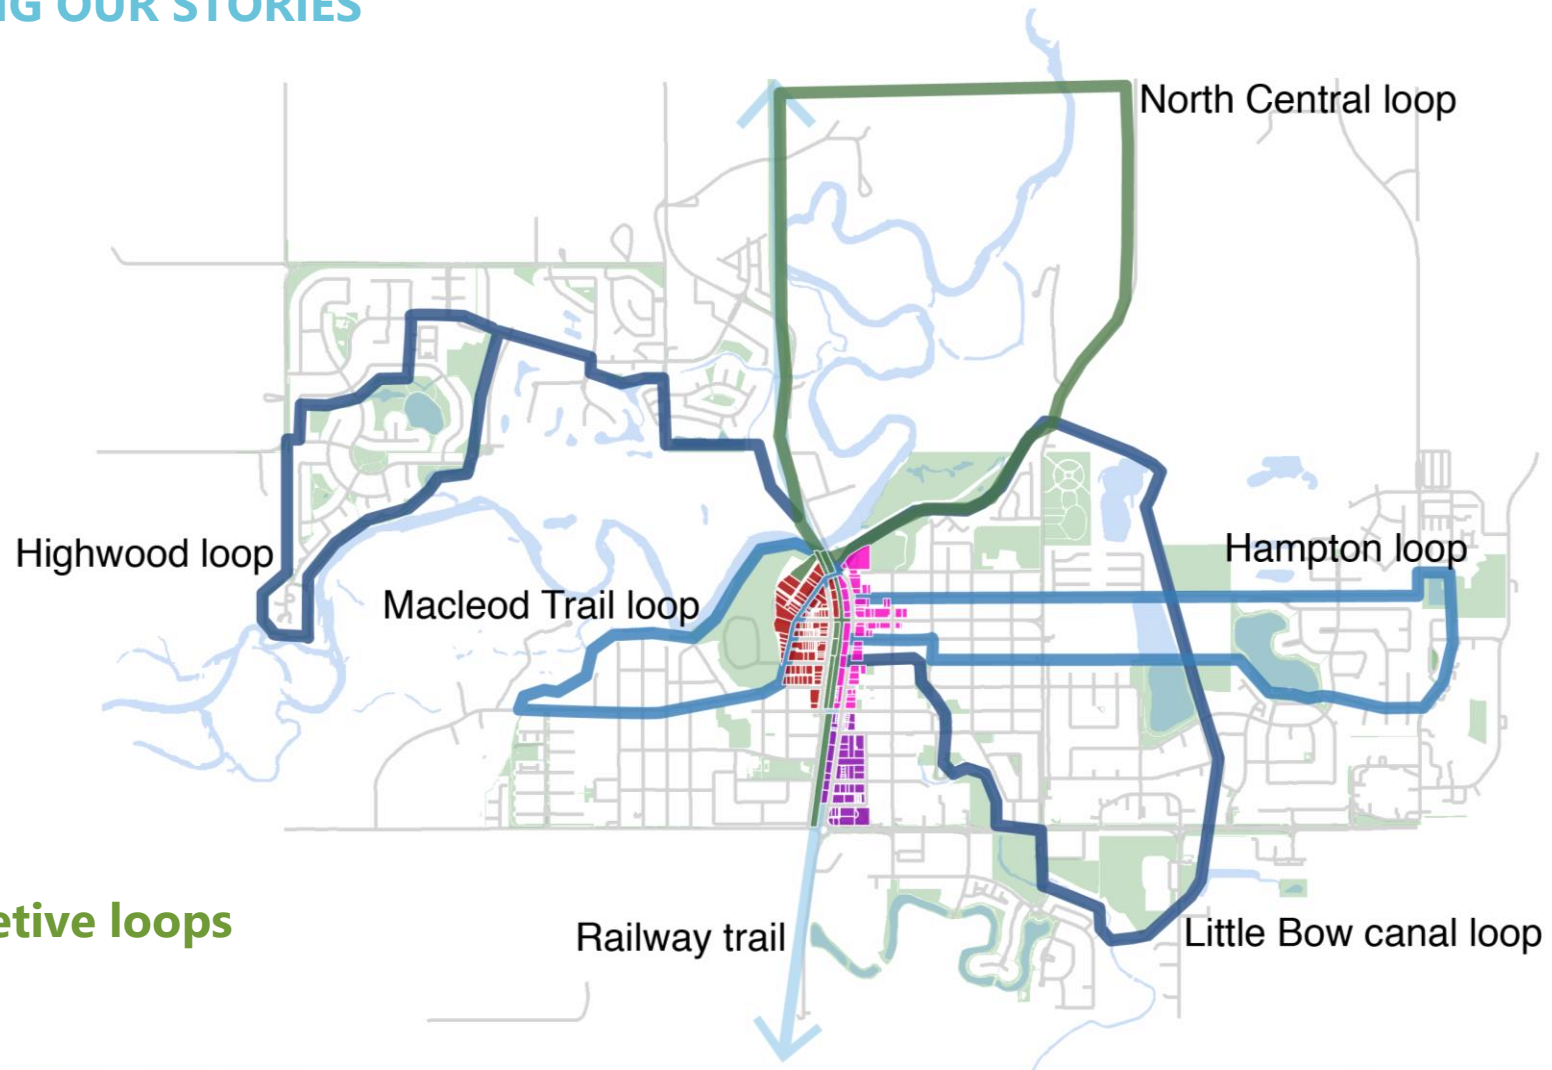

- All residents are no more than a 5 minute walk from a park.
- New neighbourhoods are built around Happy Trails and ecological connections.
- Each park should have a unique character.
- Playgrounds should include equipment for all ages.
- Better Happy Trails connections to all neighbourhoods.
- Better Happy Trails connections within all neighbourhoods.
- Bring neighbourhood lacking in base green space up to standard (e.g., Hamptons).
- Community Vitality Fund to support people with nature and recreation-based project ideas.

Telling the history of the community by means of choreographed movement through the community on interpretive loop trails.

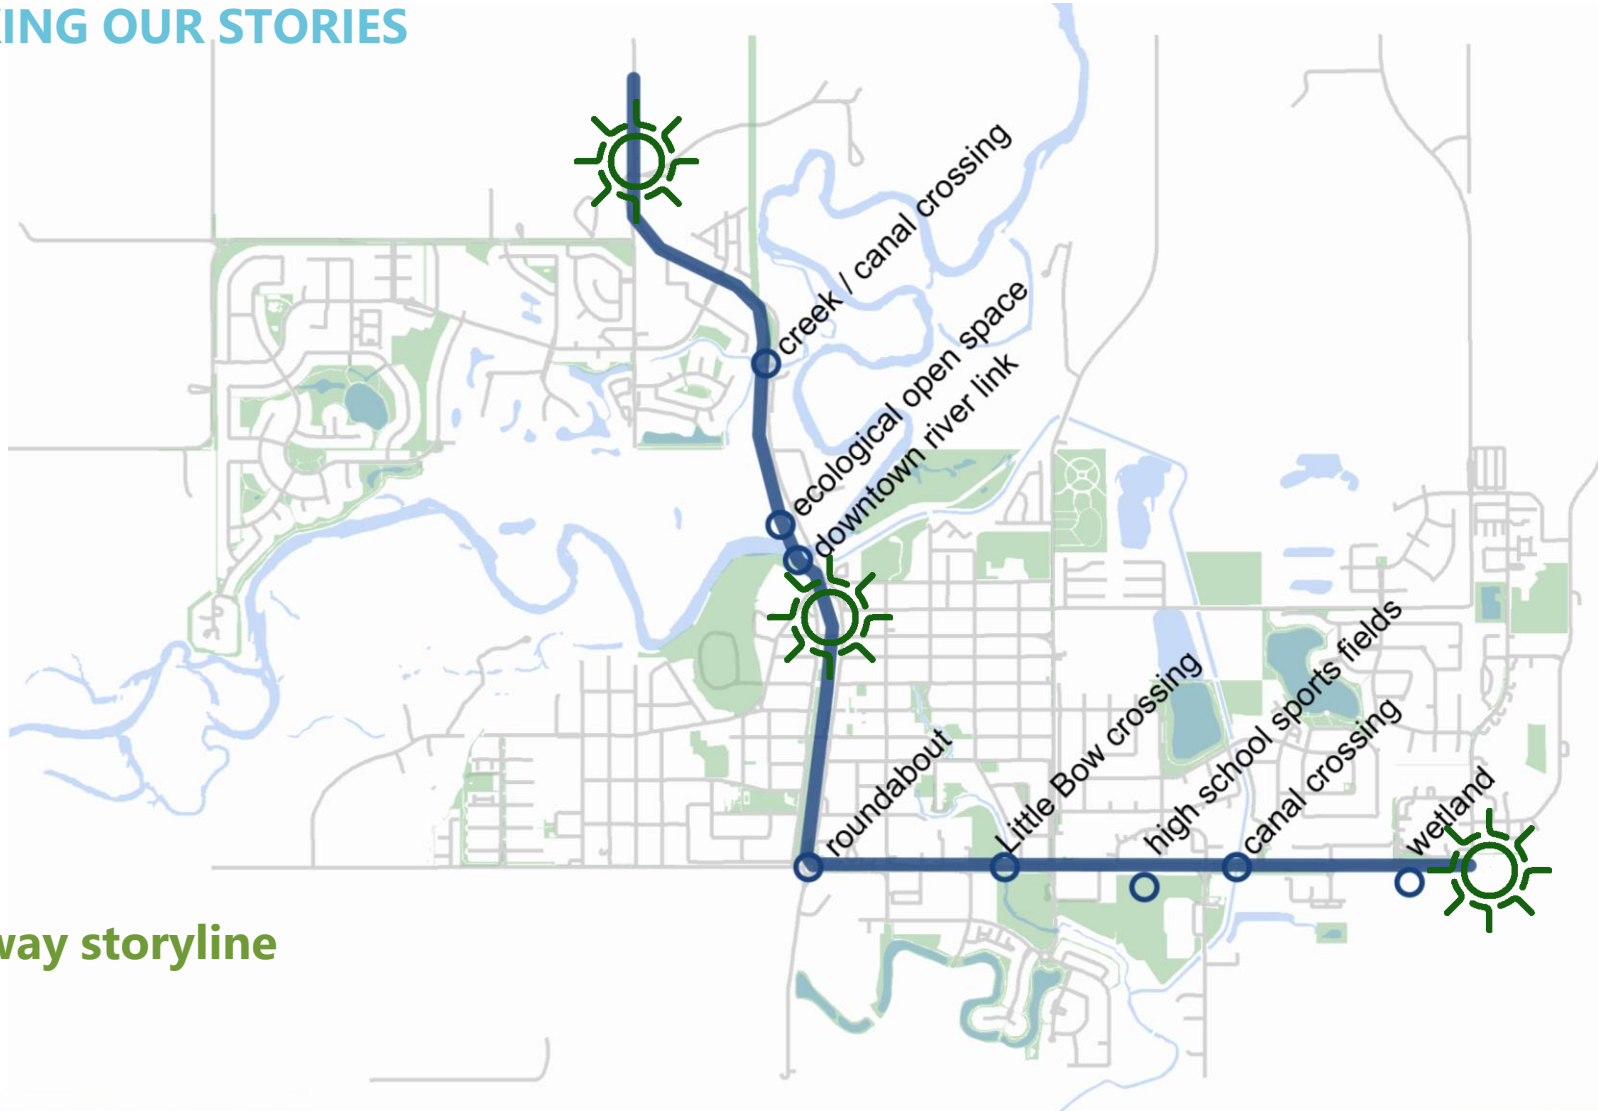

WALKING OUR STORIES
